INGROUND FIBERGLASS POOLS

ADVANTAGES OF FIBERGLASS POOLS

Fiberglass swimming pools have the lowest cost of ownership over time.

LESS MAINTENANCE

Our pools require **less maintenance** than conventional pools. Our pools’ smooth floor and walls :

- Keep dirt from sticking.
- Eliminate the risk of algae formation.
- Allow faster cleaning of the ring caused by sun lotion. The dirt will bead along the edge rather than stick as it would on a liner.

► **Not to mention :**

- No liner to replace and no painting required.

HEATING

Fiberglass pools retain their heat better :

- Fibreglass is an insulating material, which keeps the water warmer.

Combined, these two features ensure that your water will always be at least **8°F warmer** than that of any other pool. In fact, with a heating system, your fiberglass pool will allow you to start your swimming season earlier and extend it later.

Heating costs for customers who choose to purchase a water heater will be lower than those of our competitors, since our pools hold heat better than any other type of pool.

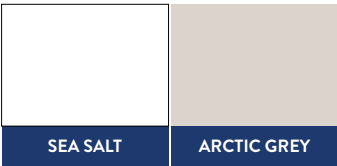

QUICK INSTALLATION

- Installed quickly, regardless of weather conditions.
- Less damage to the property than with conventional pool installations that take more than 3 weeks.
- We have all the required equipment (trucks, power shovels, etc.) to excavate your pool; all work will be carried out by our qualified employees.
- More time to enjoy the summer in your pool!

BEAUTIFUL COLOR OPTIONS

The outstanding color variety offered by Aquarino will give your pool a premium look and a great addition to your outdoor living space.
